

THE INTERSECTION OF ART AND HEALTH: INSIGHTS FROM THE UNIVERSITY OF FLORIDA *CENTER FOR ARTS IN MEDICINE*

In recent years, there has been growing attention to the intersection between art and health, a field based on a wide range of approaches and practices.

The purpose of this meeting is to explore this connection through the testimony of Prof. Ferol Carytas, who directs the Center for Arts in Medicine at the University of Florida. The Center, founded in 1996, is an international reference point in this field. Prof. Carytas will illustrate the birth of the Center and how it currently works to promote research, education, and practice of the arts in healthcare, both locally and globally. The event will be held in English.
